

# PROJECT INFORMATION SHEET

As of 23 FEB 04

**PROJECT NAME AND LOCATION:** Clinton River & St. Clair River, Michigan, Areas of Concern, Watershed Planning

**PROJECT DESCRIPTION:** The effort consists of two separate technical assistance projects in the Clinton River Area of Concern and one technical assistance project in the St. Clair River Area of concern to develop Watershed Management Plan Workplans (WMPW) and Public Participation Plans (PPP). The workplans and public participation plans will guide watershed management efforts in these areas of concern and provide assistance in stormwater planning with the goal of attaining and protecting the water quality of the Clinton River, St. Clair River, and ultimately, Lake St. Clair. One WMPW and PPP is under development for the Clinton Main Subwatershed, Clinton River, Oakland County. One WMPW and PPP is under development for each of three subwatersheds in Macomb County: Red Run, Clinton River East, and Lake St. Clair Drainage. One WMPW and PPP is under development for each of three subwatersheds in St. Clair County including the Lower Black River, Lake Huron Direct, and St. Clair River Direct. These projects are cost-shared with the local sponsors at a 65% federal-35% non-federal apportionment.

Final WMWPs & PPPs Completed	MAR 04

Macomb County FY04 Scope of Work/Letter of Agreement    APR 04  
FY04 Work Completion    SEP 04

?? **STATUS:** The Draft WMWPs and PPPs were developed following scoping with individual subwatershed advisory groups. The Drafts will be finalized following review, comment and issue/resolution with individual subwatershed advisory groups. The Macomb County watershed planning assistance will continue in FY04 following completion of the WMWP & PPP and execution of a Letter of Agreement. Work would include: Development of project team website, mapping, environmental data collection, pollutant load calculations, development of uses and goals and conducting public participation meetings. Oakland County and St. Clair County watershed planning will not be continued in FY04 due to lack of funding. FY05 funds could be used to continue watershed planning in all 3 counties and include mapping, field assessments, public surveys, model ordinance development, pollutant load calculations, evaluation of best management practices, action plan development, institutionalization plan, prioritization process and public participation.
